

TravelMate AI

Hamza | M. Usman | Jasim

Supervisor: Dr. Muhammad Faraz Manzoor

PROBLEM STATEMENT

Travel planning is **time-consuming** and fragmented. Users struggle to find personalized, real-time, and reliable travel options across multiple platforms and sources.

ARCHITECTURE OVERVIEW

KEY FEATURES

Multi-agent Orchestration

Specialized agents collaborate to handle complex travel tasks efficiently.

Real-time LLM Reasoning

Leverages advanced LLMs for intent understanding and dynamic reasoning.

MCP Server Integration

Seamless connection with external tools: Flights, Hotels, Weather, Maps. Currency Converter via MCP protocol.

Bilingual Support

Supports Urdu & English for natural and inclusive user experience.

High Performance

Optimized for speed & low cost without compromising accuracy.

RESULTS & METRICS

1.9s

AVG RESPONSE TIME
(vs ~ds baseline)

80%

COST REDUCTION
(vs traditional pipeline)
